Provider: Amazon Web Services

Amazon Web Services offers a broad set of global cloud-based products including compute, storage, databases, analytics, networking, mobile, developer tools, management tools, IoT, security and enterprise applications, to power a wide variety of workloads including web and mobile applications, game development, data processing and warehousing, storage, archive, and many others.

Edge offers a discount for access to AWS tools and resources, as well as a data egress waiver for connected members of EdgeNet.

Typical Use Cases

- An organization requires cloud-based storage for legacy data which doesn't need to be immediately usable, but needs to be accessible for discovery or regulatory requirements.

- An institution needs to create off-site, cloud based data backups for business continuity and disaster recovery.

- New curriculum or lab delivery models require virtualized desktops or applications delivered from the cloud.
