

# Security Information and Event Management (SIEM)

Last Modified on 03/23/2021 7:30 pm EDT

Provider: [AT&T Cybersecurity](#) (formerly [AlienVault](#))

Security information and event management (SIEM) software provides insight into and a track record of the security activities within an IT environment. The software provides real-time access to and reporting on security alerts generated by applications and network hardware.

## Typical Use Cases

- An institution wishes to implement a solution to allow their IT to track security alerts within their network.
- An institution requires added visibility and reporting into the types of security threats they face on a day to day basis.

## To Inquire

For more information, contact: [info@njedge.net](mailto:info@njedge.net)

## Method of Procurement

- GSA aggregator agreement under [Lead Agency](#)

## Bid, Award and Contract Documents

For bid and contract documents, contact: [info@njedge.net](mailto:info@njedge.net)
