

Advanced Endpoint Protection (Secureworks)

Last Modified on 03/23/2021 7:30 pm EDT

Provider: [Secureworks](#)

Software designed to protect end user devices from malicious files via a combination of antivirus, firewall, and auto-containment, which allows unknown potential malicious threats to test-run safely virtualized containment area before they are able to run on an end-user device.

Typical Use Cases

- An organization wishes to improve upon standard antivirus protection with a next generation endpoint protection solution.
