

Managed Security Operations Center (SOC)

Last Modified on 03/23/2021 7:31 pm EDT

Provider: [Cyberhat](#)

A managed SOC provides active monitoring and analysis of an organization's network from a security perspective. Outsourced management of a SOC provides rapid response to security incidents by an engineering team with dedicated security expertise.

Typical Use Cases

- An organization requires ongoing monitoring and response for network security.
- An organization is unable to identify, train, and retain full-time security engineers and needs to outsource network security monitoring to a third party.
