Load Balancing (F5)

Last Modified on 03/23/2021 7:34 pm EDT

Provider: F5 Networks via Carahsoft

Enterprise grade application services. Performance and security services include load balancing, DNS services, web application firewalls (WAF), bot management, SSL visibility, identity and access federation, and DDoS mitigation.

Typical Use Cases

- An organization has a large volume of traffic on its network, and requires load balancing technology to ensure no one network segment is overburdened.
- An organization requires a solution to protect web applications and APIs from evolving security threats.
