SHI

Over the past 33 years, SHI has transformed from a \$1 million “software-only” regional reseller into a leading global provider of technology services and solutions. We have over 6,000 employees worldwide and we are the largest Minority and Woman Owned Business Enterprise (MWBE) in the US. In 2021, SHI reported earnings of \$12 billion. Our Public Sector business represents \$3 billion of that overall number.

We believe our growth stems from several key factors:

- Our commitment to the Public Sector, with over 165 dedicated Public Sector sales representatives based within their State or region.
- Our ability to help our customers streamline and improve the management of their technology procurement, deployment, and recovery.
- Our extensive catalog and the ease with which we can expand our offerings to include new and emerging technology or partners that have a traditional direct to customer sales model.
- Our commitment to putting our customers’ needs first, with a specific focus on cost savings for every eligible contract user and every purchase.
