

CBTS Network as a Service (NaaS)

Last Modified on 09/19/2024 2:07 pm EDT

Solution: CBTS Network as a Service (NaaS)

Provider: [CBTS](#)

CBTS is proud to offer our Network as a Service (NaaS) solution, designed to support the needs of Edge members to provide a consumption model of network elements without owning or acquiring those assets through our NaaS offerings.

The CBTS managed NaaS cloud solution includes auto VPN, security, switching, and Wi-Fi all delivered as a service. It is provided as a fully managed network, cloud integration, management, and monitoring with an “all-in-one” network solution.

CBTS has over 800 customers using our NaaS solution at thousands of locations across the country.

Our solution can provide EDGE members with a consumption model without having to invest in capital, a refresh cycle to end technology obsolescence with 24x7 eyes on glass support, and access to our portal for co-management and visibility.
