Models and Frameworks

As Edge and EdgeMarket have grown, so has the need for rational models and frameworks to provide the structure and resources to support and accelerate integrated and impactful planning, procurement, and overall value creation for our members.

To that end, Edge has identified and adopted two complementary sets of standards:

- [Higher Education Reference Models](#) - to enable a business capabilities-based foundation for planning and procurement
- [Business Outcomes Framework™](#) - to support a business outcomes-centered approach to planning and procurement
