

RFP - HE Ecosystem #2 - (2025)

Last Modified on 02/05/2026 12:52 am EST

RFP #: 269EMCPS-25-003

BidNet Title and Link

All EdgeMarket bids are published and accessible via [BidNet](#).

To access this RFP on BidNet, click here:

- <https://www.bidnetdirect.com/new-jersey/edgemarket/solicitations/open-bids?selectedContent=BUYER>

Bid Status

All bid status information, including dates, addenda, and other items, are found on [BidNetDirect](#).

In the event of any conflict between information presented on this page and the information presented on BidNetDirect, the information presented on BidNetDirect shall prevail.

Helpful Information and Videos

The videos and presentation below were created for the first RFP in Higher Ed Ecosystem series of RFPs.

They will reference HEES #1, including the dates for that RFP, but the information presented is relevant and helpful for this RFP, HEES #2.

- [Download the HEES #1 presentation file \(PDF\)](#).
- [View the May 23, 2024 HEES #1 webinar session](#).

A Pre-Bid Conference is scheduled for February 5, 2026.

- [View the HEES #1 Pre-Bid Conference recording](#).
- A walk-through of DecisionDirector and the concept behind the Higher Ed Ecosystem RFP series begins [here](#).

Overview

The purpose of this RFP is to procure under a single event a broad spectrum of software solutions for the Core Learning, Teach and Research functions along with the Administrative, Facility, and Technical functions within Higher Education.

This RFP is the second in the Higher Education Ecosystems series of procurements. (See [RFP - HE Ecosystem #1 - Academics and Administration \(2024\)](#).)

The strategic goal of this procurement is to provide Members and Participants with streamlined access to a comprehensive array of software solutions under a single contract vehicle. Conversely, our second goal is to make it easier for the awarded solution providers to include their full solution portfolios under that same contract vehicle.

Note to Bidders on Higher Ed Ecosystem #1

Bidders and awardees under [RFP - HE Ecosystem #1 - Academics and Administration \(2024\)](#) are encouraged to review the expanded Business Capabilities scope of this RFP to determine if this RFP can include some portion of their solution portfolio that the first RFP did not. See further below for details on the expanded scope.

HE Ecosystem Procurement Complemented By Related Procurements for System Selection, Implementation and Other Services

This procurement, coupled with our awarded array of distinguished and awarded system selection, cloud migration and implementation consultants (see [IT Professional Services](#)), make it far easier and faster for our rapidly growing and highly diverse consortium members to choose and implement the solutions that will deliver the best possible outcomes.

Key Requirements Sections of this RFP

The sections below provide an overview of the three primary solution requirements sections in this RFP:

- **Proposed Solution Portfolio**
- **Solution Support for Business Capabilities**
- **Solution Support for Business Value**

Detailed response guides are provided for each requirements section, and are accessible to bidders via DecisionDirector.

Proposed Solution Portfolio

The purpose of the **Solution Portfolio** segment is to provide an orderly capture of marketplace solution information. The primary building block of a bidder's Solution Portfolio is a "**Solution Group**".

- A Solution Group is a named collection of **one or more related applications and modules** that serve and may be marketed as a product line, solution family, or suite.
- A hypothetical example might be Company Z's Flagship Series solution family, with the Flagship Finance, Flagship HCM and Flagship CRM major applications. The Flagship Finance application may have Accounts Payable and Accounts Receivable as named modules.

DecisionDirector is configured to allow bidders to propose up to five (5) Solution Groups.

Solution Support for Business Capabilities

This section defines a business capability-based functional scope and requirements.

Edge has adopted the [Higher Education Reference Model \(HERM\) Business Capabilities Model \(BCM\)](#) from [CAUDIT](#) (and available through [EDUCAUSE](#)) to serve as the foundation of the functional scope and requirements for this RFP.

The scope of this procurement includes software solutions that support the following business capability areas as defined in the HERM BCM:

Learning and Teaching	Research	Enabling Capabilities (Admin/Facilities/IT)
Curriculum Management	Research Opportunities & Planning	Strategy Management*

Learning and Teaching	Research	Enabling Capabilities (Admin/Facilities/IT)
Student Recruitment	Research Funding	Business Capability Management*
Student Admission	Research Assurance	Governance, Risk & Compliance*
Student Enrollment	Research Management	Library Administration
Curriculum Delivery	Research Delivery	Advancement Management
Student Assessment	Research Dissemination	Marketing Management*
Completion Management		Engagement & Relationship Management (CRM)
Student Management		Legal Services*
Student Support		Information & Communication Technology Management*
		Human Resource Management
		Financial Management
		Information Management
		Facilities & Estate Management*
		Supporting Services*

Each capability area has two or more specifically defined business capabilities that form the foundation of the specifications. Capability areas marked with an asterisk ("*") are either entirely new or substantially expanded from the scope of the Higher Ed Ecosystem RFP #1.

See the HERM BCM images shared further below for a high-level visual overview of the functional scope of this RFP.

Solution Support for Business Value

The HE Ecosystem RFPs also include a section that seeks from solution providers examples of the business value their customers have experienced as a result of deploying the proposed solution(s).

EdgeMarket has adopted the [Business Value Lexicon™](#) created by Business Value Story™ to provide the scope and organization for this section.

Important Note: Although Business Value Story™ provides business value and outcomes planning and assessment resources and services to buying organizations and solution providers, EdgeMarket RFPs will never require bidders to purchase such resources or services, nor are such resources and services required for bidders to formulate bid responses.

Have You Completed a Vendor Profile?

If your firm has not yet done so, please take a few minutes to complete our [Vendor Profile Submission](#) form. This provides use with very useful background information and will ensure that you are added to our communications.
