Modernizing Public Sector Technology — With Purpose, Precision, and Proven Results

Founded in 2003 and headquartered in New Brunswick, New Jersey, Right Angle Solutions, Inc. (RAS) is a certified Minority and Small Business Enterprise (MBE/SBE) specializing in technology modernization, cloud solutions, and data transformation for government, education, healthcare, and transportation clients nationwide.

Over more than two decades, RAS has delivered 150+ successful implementations for 50+ clients across multiple U.S. states, helping public agencies simplify operations, strengthen interoperability, and leverage data as a strategic asset. RAS holds Microsoft Certified Partner status with specialization in Azure Government Cloud and Dynamics 365, and deploys all solutions within FedRAMP-authorized environments aligned with CJIS, HIPAA, and NIST 800-53 standards.

The company's proprietary RightSpot™ platform, a cloud-native, mobile-enabled solution for real-time field visibility and coordination, has been deployed in New Jersey school districts and public agencies, demonstrating RAS's ability to bring innovation from concept to production with speed, compliance, and scale.
